

Paper and Steel Industries

The paper industry is one of the main client bases of John D. Hotchkiss Ltd, and we are still the preferred supplier of roll manufacturing, roll refurbishment, and rapid response breakdown services in this sector.

At John D. Hotchkiss Ltd our expertise has grown through many years of working with a broad client base, including DS Smith, Kimberley Clarke, Smurfit Kappa and De La Rue.

We are a company with the experience, knowledge and manpower to reach the correct solution, either producing bespoke plans or designs using our 3D CAD technology and trained draughtsmen or working to drawings supplied by our customers.

You will be advised and supported all the way through the process by our friendly and knowledgeable team of staff.
