

THE HOTCHKISS GROUP OF ENGINEERING COMPANIES

EMR FRAG ROTOR 6000 HP

This is a 23 tonne Metal Fragmentiser for European Metal Recycling. The original bearing had seized on to the shaft, rendering the part useless.

It has, however, been given a new lease of life.

The bearing was removed and the shaft turned. A thick walled steel sleeve was shrunk on to the newly turned shaft and pegged in to position.

Once more the part was set up on our large capacity CNC lathe, which is capable of taking 30 tonnes in weight and 12m in length, and a new bearing seat fitted and fully machined.

More information on our workshop machining services can be found on our [website](http://www.hotchkissengineeringgroup.co.uk), www.hotchkissengineeringgroup.co.uk.

Workshop Machining Services

John D Hotchkiss Ltd
Main Road
West Kingsdown
Sevenoaks
Kent, TN15 6ER
