

THE HOTCHKISS GROUP OF ENGINEERING COMPANIES

RAPID RESPONSE: DESIGN, MANUFACTURE & INSTALLATION

Cortland Fibron BX Ltd are manufacturers of Umbilicals, Hoses and Electro-Mechanical Cables for offshore and subsea projects. The subsea market demands a high level of expertise, and on-time delivery is essential. The company pride themselves on offering their customers a first class product based on solid engineering foundations and the latest techniques.

Hotchkiss Engineering Group are continually contracted to support them in this through our ability to provide an instant service.

Whilst understanding the crucial need to meet deadlines in the subsea sector, our engineers have designed, specialist cable winding machinery prior to its manufacture and installation. Our ability to understand our clients' needs enables us to hit the ground running when timing is limited. In many instances we have been able to fulfill Cortland Fibron's machinery requirements without any specifications being supplied.

More information on our workshop and in-situ machining services can be found on our website:
