

The Marine Industry

DRIVE SHAFT

John D. Hotchkiss Ltd have been involved in the manufacture and supply of small precision engineered actuator parts to large 20 Tonne sluice gate refurbishments for port authorities in the harsh marine environment.

This success has been achieved over several years of working with various customers on all kinds of projects. We have become experts in providing large specialised CNC machined parts and precision engineered components.

The John D. Hotchkiss team have a wealth of knowledge and experience of stainless steel machining and fabrication within the paper sector and there has been a natural progression towards repair and overhaul for the Marine industry.

Our continuous investment in machines, equipment, processes and staff training as well as our latest quality accreditation: ISO 9001 UKAS approval, sets us apart from our competitors.
